ABOUT ME

Enthusiastic computer science student dedicated to pursuing a career in cybersecurity. Currently completing a bachelor's degree with a focus on developing comprehensive skills in programming, algorithms, and database management. Eager to contribute technical expertise and passion for cybersecurity to ensure robust digital security solutions in the professional realm.

ACHIEVEMENTS

- **Council Speaker**
- **Scouts and Guides President**
- **Club Representative**

SKILLS

Presentation
Exceptional ability to create and deliver engaging and impactful presentations.

Event Hosting and Emceeing
Proficient in hosting a variety of events, including conferences, seminars, and social gatherings.

Continuous Learning
Strong adaptability and a keen interest in personal and professional development.

Interpersonal Skills
Proven capacity to collaborate and work successfully in diverse team environments.

PROJECTS

Supermarket Website Development
- Developed a fully functional supermarket website as part of a university assignment.
- Utilized **HTML, CSS,** and **JavaScript** to create an interactive user interface and dynamic content.
- Implemented features such as product listings, shopping cart functionality, and user authentication.
- Designed responsive layouts for optimal viewing across different devices.
- Overcame challenges in optimizing website performance and ensuring cross-browser compatibility.
- Received positive feedback from peers and achieved a high grade for the assignment.

Smart India Hackathon: Mental Health Support Concept
- Participated in the Smart India Hackathon addressing self-identification of mental health status and accessing support. Conceptualized a website solution for mental health detection, integrated emotional support chatbots, and personalized therapy plans. The experience provided me with numerous opportunities to collaborate with others and work towards common goals. Through effective communication, active listening, and compromise, I learned how to effectively contribute to a team and leverage the strengths of my teammates to solve problems efficiently.

WRITING EXPERIENCE

Blogging

I have authored several engaging blog posts on my blog, 'The Elvina Blog,' covering diverse topics such as 'Perspective is Point of View,' 'Challenges: An Essential Ingredient to an Authentic Life,' 'More than a Figure, More than a Number,' and 'Mutual respect is a two-way street.' These experiences have not only improved my writing skills but have also allowed me to share valuable content with a broader audience.

ONLINE COURSES AND CERTIFICATIONS
- **Security management**
- **Internet of Things and The Cloud**
- **Starting Python Programming**
- **Introduction to HTML Structures in Website Development**
